Tourette Association of Texas is a 501(c)3 organization, qualified to receive charitable contributions in accordance with IRS regulations.
EIN 74-2198940

Please join the **TOURETTE ASSOCIATION OF TEXAS**, along with the hundreds of thousands of families affected by Tourette's syndrome, to raise awareness of this much misunderstood and misdiagnosed neurological disorder.

Tourette's syndrome (TS) is a complex neurological disorder characterized by motor and vocal tics. Symptoms begin in childhood and cause those affected to make movements and noises they cannot control. While not life-threatening, TS is nonetheless often painful, disruptive and isolating. Many with TS also have associated conditions such as Attention Deficit Hyperactivity Disorder, Obsessive Compulsive Disorder, and/or learning differences. While it is believed to be genetic, the exact cause of the symptoms is still unknown.

Studies indicate up to 2% - 3% of the population, with approximately 1 in every 100 school age boys and 1 in every 300-400 school age girls, may have Tourette's. Although symptoms usually diminish in adulthood, TS is considered a lifelong disorder.
